

## PAPER WORK

It's hard to believe, we know, but this elegant white desk is actually made from corrugated cardboard! Created by Mary Dorrington Ward and Pat Doyle for Cardboard Future Limited, the eco-friendly 'Paperweight Desk' is treated with glossy varnish so it's water-resistant. It's self-assembly, but with no screws or staples required, it's a doddle to make - and costs just £140 ([cardboardfuture.com](http://cardboardfuture.com)).
